

MEDICATION POLICY

Our patients are very important to us. We always try to provide you with the best treatment possible, in a pleasant and caring environment. We are sensitive to the discomfort you may be feeling, and for that reason, Dr. Slater may give you medication to help with your discomfort.

1. Medication should be taken as instructed by Dr. Slater or his assistant.
2. Contact your pharmacy for all medication refills.
3. If Dr. Slater has prescribed medication for treatment, he cannot refill this prescription until after the treatment has been started.
4. Medication refills will need to be requested before 4:00 pm.
5. Medications will not be filled on the weekend.
6. It is our policy not to prescribe for undiagnosed pain.
7. If medication is needed beyond the normal post-operative period, or if discomfort persists after the completion of treatment, you will be referred to a specialist to help with your discomfort.

I have read and understood the policy, or it has been explained to me.
